WS Workwear

Made Safer™

# INTRODUCTION

## ABOUT US

Since 1993 WS Workwear has been supplying clothing to some of the largest industrial organisations in Australia.

With workers' safety as our priority all WS Workwear clothing and fabrics are developed to help keep you safe and comfortable all day.

For almost 25 years our design and development team have been working with customers to develop the highest quality shirts, jackets, pants, coveralls, rain gear, safety vests for both men and women that are both comfortable and durable.

We work closely with our customers to offer the best solutions to their uniform requirements. Our comprehensive product and service offering has grown through the supply to various markets including mining, resources, construction, engineering, manufacturing and transport.

WS Workwear is continuously improving its' service offering, quality, fit, styling and consistency. Quality inclusions such as UPF ratings of 50+, and new product developments for improved breathability and venting, as well as double stitched seams helps to ensure wearer comfort and safety at work.

All WS Workwear is manufactured to comply with stringent Australian Safety Standards.

## OUR MISSION

### NO CORNERS CUT.

NO JOB IS 100% SAFE.

Whatever the industry, there will always be risk in achieving reward. That's why we at WS Workwear believe that every worker deserves gear that respects their efforts, by respecting their safety. No corners cut. No style over substance.

### QUALITY, ALWAYS.

All WS Workwear is manufactured and quality tested to meet, comply with, or exceed, stringent Australian Safety Standards.

## WS Workwear

A leading Australian supplier of Safety Workwear

# Made Safer™

## SAFETY FOR ALL.

With customers and their safety as our priority WS Workwear proudly aims to play a part in ensuring that EVERY Australian worker gets home safely from a hard day's work, EVERY day.

Our internal labels remind the wearer to check their garment for compliance at periodic intervals throughout the year.

The simple checklist below ensures you are **"Made Safer"** all year long.

### CHECKLIST FOR HI VISIBILITY GARMENTS

#### HAS YOUR HI VIS SAFETY GARMENT STARTED TO SHOW: -

- Excessive fading?
- Mechanically damaged garment components?
  - Eg: are seams broken or worn?
  - has reflective tape faded or detached?
- Signs of dirt or marks that cannot be removed?

### IMPORTANT NOTE

If you have answered yes to any of the above, your garment may not conform to specified Australian Standards and should be replaced.

We recommend reviewing garment care instructions to prolong the life of your garment.

## WS WORKWEAR GARMENTS MEET THE FOLLOWING STANDARDS

### AS/NZS 1906.4.2010: High Visibility Materials For Safety Garments

To ensure your safety and protection at work all garments in the WS Workwear range are developed to meet the relevant industry and product category standards.

High visibility safety apparel is needed if you work where there is low light and poor visibility, especially if you are working around moving vehicles (cars, trucks or other machinery traveling under their own power - e.g., forklifts etc. Wearing high visibility clothing allows you to be seen by the drivers of those vehicles sooner and more readily.

The human eye responds best to large, contrasting, bright or moving objects. Worker visibility is enhanced by high colour contrast between clothing and the work environment against which it is seen. Extra protection is required at dawn, dusk and night time where the addition of retro reflective tape that reflects light is required to increase visibility.

**CLASS F** = Daytime fluorescent

**CLASS R** = Retro reflective material

**CLASS RF** = Retro reflective and fluorescent

**CLASS NF** = High daytime visibility, non fluorescent

### RETRO REFLECTIVE MATERIALS

WS Workwear garments are manufactured using reflective tapes comply with AS/NZS 1906.4.2010 (Class R) and exceed the brightness requirements for reflective materials.

## HIGH VISIBILITY SAFETY GARMENTS

### AS 4602.1: 2011

#### Part 1: Garment for high risk applications

This standard specifies the design, placement and coverage of high visibility colour as well as the design and placement of retro-reflective tape.

Class N garments allow for visibility in low light or night conditions. When combined with a Class D compliant garment it becomes suitable for all conditions, day or night (Class D/N). When exposed to hazards such as moving traffic, plant or equipment this standard should be followed.

**CLASS D** = Daytime use

**CLASS N** = Night time use

**Class D/N** = Day / Night use

## SUN PROTECTION - EVALUATION & CLASSIFICATION

### AS 4399:2020

To guard any worker against sunburn and exposure to harmful UV rays the WS Workwear clothing range offers protection in fabric and design under the new amendment to the standard.

WS Workwear recommends the wearer should wear garments that comply with UPF 50+ with full arm and leg coverage: To ensure complete protection, a hat and sunscreen should also be worn.

UPF (Ultraviolet Protection Factor) represents the ratio of sunburn-causing UV without and with the protection of the fabric, similar to SPF (Sun Protection Factor) ratings.

A rating of 50+ is the highest rating available and is classified as excellent protection.

This standard specifies the requirements for determining the UPF level of protection from the sun for garments that are worn in close proximity to the skin. There are three protection categories:-

◆ **Minimum Protection** (UPF 15)

◆ **Good Protection** (UPF 30)

◆ **Excellent Protection** (UPF 50, 50+)

## AUSTRALIAN RAIL PERSONAL PROTECTIVE EQUIPMENT

### AS 7471:2019

Minimum requirements - This Standard aims to establish standardisation of PPE clothing within the Australian Rail industry by outlining hi visibility colour and various reflective tape configurations that may suit in this sector.

It important to note, each Australian state and rail sectors have their preferences in relation to reflective tape configurations.

WS Workwear offers garments with the various tape configurations required by this standard.

## FABRIC SAFETY

### ISO 14184-2:2011

Formaldehyde is a volatile organic compound and is present in nature in small quantities. It can cause irritation when worn against the skin which is why all WS Workwear fabrics are tested to ensure they comply with International and Australian standards for the allowable levels of formaldehyde.

We independently test each batch of fabric to ensure naturally created formaldehyde levels are kept well within the recommended standards, ensuring you are **“Made Safer”**.

## WATERPROOF

### AS 2001.2.18-1987

To keep you dryer whilst working in wet environments either indoors or outdoors WS Workwear wet weather garments use waterproof fabric and have all seams sealed to keep you protected from the elements.

## STATIC CONTROL

### AS/NZS 1020:1995

Material such as paper, plastic and textiles normally contain an equal number of positive and negative charges - that is, they are electrically balanced. Friction can disturb this balance, causing the material to become electrically charged.

WS Workwear is made from natural fibres like cotton and cotton - blends that manage static build up.

The AS/NZS 1020:1995 standard defines recommendations for the control of static electricity. 100% cotton and 50%/ 50% cotton blend products are defined as suitable fabrics to manage the risk of static build up. PPE (Personal Protective Equipment) is equipment or clothing that will protect the user against health or safety risks at work.

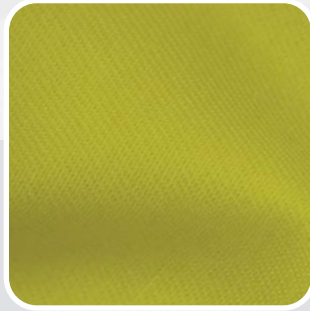

COTTON

145GSM COTTON RIPSTOP

A fine fabric weave with coarse fibres ribbed at intervals (grid appearance) that makes them resistant to tearing and ripping

160GSM COTTON DRILL

Lighter cotton fabric in drill weave (diagonal) that provides durability and comfort to clothing.

270GSM COTTON CANVAS

This tight and robust weave offers durability against harsh applications.

310GSM COTTON DRILL

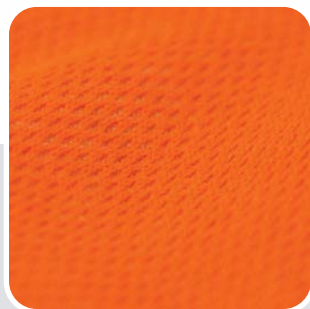

Traditionally used in Workwear due to its strong bias (diagonal) weave. It offers durability and tear strength.

POLYESTER

OXFORD

A strong tight weave that helps reduce water penetration.

MICROMESH

Shiny, lightweight synthetic fabric with small eyelets which provides excellent breathability.

POLYESTER FLEECE

Soft brushed fabric that insulates body heat. Front face is soft and inner face is brushed for comfort.

POLYESTER	KNIT	RAINWEAR	HEAVY WEIGHT

	Ripstop 145gsm		Cotton Drill 310gsm
	Cotton Drill 160gsm		Cotton Denim 460gsm

**CORDURA**

Some WS Workwear garments have Cordura® incorporated into the fabric to enhance tear and abrasion resistance.

## QUALITY & FABRIC TESTING

WS Workwear garments and fabrics undergo rigorous testing to ensure they are fit for purpose.

Our international production facilities have received accreditation under ISO 9001-2015.

WS Workwear fabrics undergo detailed testing processes before being approved to ensure that fabrics are the correct colour and meet required Australian Standards. Pre-production sample fabrics from new batches are rigorously tested to ensure continuity of our standards approval and quality.

Product materials and components are of the highest quality, and our manufacturing and testing partners use state-of-the-art technology and equipment.

### ADDITIONAL QUALITY CONTROLS ARE AS FOLLOWS:

- ◆ Samples of fabrics are retained for our records and comparison.
- ◆ All garments contain labels identifying the fabric lot used.
- ◆ Testing is undertaken in the fabric mills prior to dispatch.
- ◆ Quality controls are maintained in our ISO approved factories by our accredited Quality Control team.
- ◆ Pre-shipment samples for final inspection and confirmation are sent to our Product Development team for checking and approval prior to shipment.
- ◆ Master samples of fabric and garments are also retained in our Quality Control department to enable future orders to be cross-checked for quality and consistency.

A variety of tests are carried out on all fabrics to meet specific performance and safety criteria to comply with Australian Standards.

AS/NZS 4602.1:2011 specifies the visual requirement for high visibility safety garments for occupational wear by people who may be exposed to hazard from moving traffic, moving plant or equipment in high risk situations and are directly related to consumer end use of textile products.

## ETHICAL SOURCING

As a key Bunzl brand, WS Workwear is committed to the social, environmental, and financial sustainability of our manufacturing partners.

In addition to ISO International Audit Standards, meeting our own WS Workwear requirements is essential for attaining and upholding the benchmark to do business. All suppliers and their factories must adhere to Bunzl's strict **Ethical Sourcing and Modern Slavery Policy**.

Our supply chain management processes ensure these products are manufactured and sourced responsibly. Our Ethical Sourcing Policy ensures that Bunzl sources products in an ethical and consistent manner. A key element is our Supplier Code of Conduct, which establishes our expectations for all suppliers in the areas of labour and human rights, environment, health and safety, ethics, and management systems.

We have an assurance and quality control team based in Asia, which performs regular audits of our direct suppliers to ensure that they meet our standards in relation to human rights and conditions of work. The audits cover various aspects including child, forced or bonded labour, disciplinary practices, management of homeworkers and foreign migrant workers, freedom of association, wages, working hours and health and safety.

# SUSTAINABILITY

SUSTAINABILITY

As part of the global Bunzl family, WS Workwear supports the United Nations Sustainable Development Goals and our mission is to lead the way in promoting sustainable practices for a more environmentally conscious world.

As illustrated below, our sustainability strategy consists of four pillars that align with our business and the UN's Sustainable Development Goals: **Supply Chain; Products & Customers; People & Community; and Environment & Climate Change.** These pillars clarify the positive commitments we have made, including specific targets in areas where we have the most meaningful impact.

## SUPPLY CHAIN

Embedding responsible and ethical practices

- **Responsible sourcing**
- **Human rights and modern slavery**
- **Standards and certifications**

Our strict Ethical Sourcing Policy and regularly audited Supplier Code of Conduct ensures that we source products in an ethical and consistent manner.

Our QA team based on the ground in Asia ensures all suppliers meet our high expectations in the areas of labour and human rights, environment, health and safety, ethics, and management systems.

## PEOPLE & COMMUNITY

Ensuring a culture where everyone counts

- **Diversity and inclusion**
- **Health & safety**
- **Indigenous engagement**
- **Charitable giving**

The principles of diversity and inclusion are at the core of our culture at WS Workwear and the Bunzl group. We strive to apply these equitable principles to our staff, as well as the broader communities we are part of.

Our commitment to our staff, the community and Indigenous people is about working with organisations and individuals to turn their good intentions into real actions. We have long standing, sustainable partnerships with several indigenous organisations including the Clontarf Foundation, Cole Supplies and Heart2Heart.

As responsible corporate citizens we also invest in several charities and offer community service leave to all our employees who wish to spend time supporting a charity.

## PRODUCTS & CUSTOMERS

Transitioning to a circular economy

- **Circular economy**
- **Product stewardship**
- **Innovation**
- **Transition planning**

A circular economy is one that utilises waste as a resource. We are at the centre of the distribution system, which means we have the unique opportunity and capacity to aid the transition to a circular economy.

Through providing products and packaging made from renewable materials, containing recycled content, or that are fully recyclable, compostable, or reusable, we are working towards keeping waste out of nature.

## ENVIRONMENT & CLIMATE CHANGE

Minimising our emissions and waste

- **Energy and emissions**
- **Waste to landfill**
- **Plastic pollution**

We have ambitious plans to reduce the carbon emissions from our operations and vehicle fleet. This includes optimising energy efficiency, solar installations, and the purchase of renewable electricity. In addition, our fleet will transition to hybrid vehicles by 2025.

**WASTE TO LANDFILL** - We operate and maintain a certified ISO14001 Environmental Management System at our Australian and New Zealand sites and have an ardent waste improvement program that will see waste to landfill (from our operations) reduce significantly in the coming years.

**PLASTIC POLLUTION** - Plastic pollution is one of our biggest challenges and that's why we are working hard to remove plastic from our packaging, incorporate recycled plastic in some of our garments, and partner with customers and other suppliers to facilitate behavioural change in this area.

### DELIVERING SUSTAINABLE SOLUTIONS

Visit our website to learn more about our policies and initiatives.

## VISIBILITY

CLASS D  
DAY USE ONLY

### DAY CLASS

Day [D] garments are made from high visibility fabrics and are designed to keep you safe by allowing you to be more visible during daylight. Garments are tested and comply with AS/NZS 1906.4:2010 & AS 4602.1:2011. Note: Retro-reflective tape does not contribute to visibility during normal daylight conditions.

Day/Night [D/N] is a combination of both Day [D] and Night [N] standards as listed. These garments are manufactured using a specified design of both high visibility fabric and retro-reflective tape. Combining the benefits of both fabric and tape configurations allows you to be seen more easily, both day and night. Garments are tested and comply with AS/NZS 1906.4:2010 & AS 4602.1:2011.

CLASS D/N  
DAY OR NIGHT USE

### DAY & NIGHT CLASS

Day/Night [D/N] is a combination of both Day [D] and Night [N] standards as listed. These garments are manufactured using a specified design of both high visibility fabric and retro-reflective tape. Combining the benefits of both fabric and tape configurations allows you to be seen more easily, both day and night. Garments are tested and comply with AS/NZS 1906.4:2010 & AS 4602.1:2011.

NIGHT USE ONLY

### NIGHT CLASS

Night [N] garments are made from non high visibility fabrics and use retro-reflective tape as a means of keeping you visible - reflecting light back towards the source allowing you to be seen more easily at night-time and in low light conditions. Garments are tested and comply with AS/NZS 1906.4:2010 & AS 4602.1:2011.

RAIL COMPLIANT

### RAIL COMPLIANT AS 7471:2019

Garments specifically design for Rail industry are required to meet AS 7471:2019. Some sectors have their preferred reflective tape configurations - like X back pattern.

REFLECTIVE

### REFLECTIVE

Australian compliant reflective tape provides you with additional visibility protection.

## PROTECTION

SUN PROTECTION

SUN PROTECTION

SUN PROTECTION

SUN PROTECTION

### UPF RATING 50+, 30, 15

Ultra Violet Protection Factor (UPF) measures ultraviolet radiation from the sun.

**UPF 15** - Minimum protection

**UPF 30** - Good protection

**UPF 50, 50+** - Excellent protection

A rating of 50+ is the highest rating and is defined as excellent protection from the sun.

SHOWER PROOF

### SHOWERPROOF

A showerproof garment will keep you dry and comfortable in a light rain shower. These garments will not provide the same level of protection as a waterproof garment.

STATIC CONTROL

### STATIC CONTROL

Standard AS/NZS 1020:1995 is The Control of Undesirable Static Electricity. Cotton fibres naturally do not hold or generate static electricity which makes it the perfect choice for use in industrial workwear.

WET WEATHER

### WATERPROOF

These garments have been manufactured using fabrics with a waterproof finish, coating or dual membranes to avoid water penetration. Dual protection seams have been heat sealed to keep you dry and comfortable.

Garments are tested and comply with AS 2001.2.17 -1987. (Hydrostatic Pressure Test)

## COMFORT

VENTED

### VENTED GARMENT

Our workwear garments have several venting systems available to meet a variety of requirements. Our Koolflow range has a vertical venting system and is designed to take advantage of the natural flow of air. Other styles have underarm and/or horizontal vents to keep you cool.

COOL LIGHT WEIGHT

### SUMMER WEIGHT GARMENT

Our 145gsm and 160gsm fabrics are light, durable and designed for wear in the hottest, harshest conditions whilst still keeping you comfortable.

EASY CARE

### EASY CARE

When laundered correctly, our garments containing specialty fibres, fabric weaves, constructions and treatments are easy to maintain. Garments are hardwearing, practical and require no special treatment during washing.

EASY FIT

### EASY FIT / FLEX / STRETCH

Garments with this have added stretch in the construction via within fabric composition, elastic or flexi-fit adjustable waist for added comfort or flexibility.

# SHIRTS

## WHATEVER YOU'RE DOING WE'VE GOT A SHIRT TO FIT

You can also be confident that all WS Workwear garments will retain their colour and shape, wash after wash.

## YOU WORK HARD AND SO SHOULD YOUR WORK SHIRTS!

At WS Workwear we respect the need for work shirts to be safe, comfortable enough to move freely and tough enough to withstand the harsh Australian elements and even harsher washing.

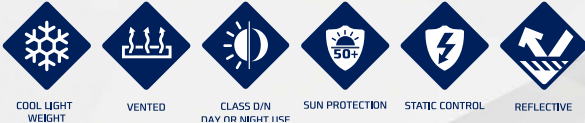

We have a comprehensive range of hi vis shirts complying with Day or Day/Night standards, with a choice of fabrics, weights, designs and taping configurations.

## QUALITY COUNTS

Our seams are double stitched and hems are double-folded and securely finished. Bar tacking is used at stress points along with adjustable twin button closure on all shirts including those with a gusseted sleeve.

## FOR A COMFORTABLE FIT

It is important to measure correctly

## WHEN MEASURING

Make sure the tape measure is level and not tight

## SPECIAL NOTES

### FOR TROUSERS

Use only waist and inside leg measurements to make your selection.

### FOR SHIRT CHEST

Please note this is "TO FIT" chest measurement - shirts chest measurements are bigger for comfort and movement.

### FOR JACKETS

Use chest measurement only. Jackets are normally worn over clothing and have been designed to be slightly bigger than a shirt.

THIS GUIDE FOLLOWS THE AUSTRALIAN BODY SIZING MEASUREMENTS RECOMMENDATION. THESE ARE NOT GARMENT MEASUREMENTS (WITH THE EXCEPTION TO FIT WAIST FOR SHORT/PANTS)

## RECOMMENDATIONS TO PROLONG THE LIFE OF YOUR GARMENTS!

### QUICK TIPS

Always follow instructions on all care labels attached to the garment.

Dry and store safety hi vis garments away from sources of heat and light.

Inspect regularly for garment serviceability, excessive fading, mechanically damaged components or dirt/soiling.

### SPECIAL NOTES

If any of the above is not followed, it may result in garment non-conformance to specified Australian Standards and therefore should be replaced.

We recommend a critical garment examination every 3-6 months intervals.

### GARMENTS TRIMS

Just like fabrics, components like reflective tape, polyester patches and other trims require care.

Here are some extra tips:

- ◆ Where possible, you should wash the garment inside out. This helps protect trims for any abrasion and avoid any bleeding of colours.
- ◆ Do not use fabric softener on reflective tape garments. Excessive amounts of fabric softener may significantly damage the reflectivity of the tape.
- ◆ Excessive drying on domestic dryers will damage reflective tape, garment stitching. Where possible line dry.

## WASHING INSTRUCTIONS

### COTTON DRILL

#### WARM MACHINE WASH

DO NOT WASH OVER 60 °C

WASH GARMENT SEPARATELY BEFORE FIRST USE

WASH GARMENT WITH SIMILAR COLOURS AND GARMENTS FOR CONSECUTIVE WASHES.

#### DO NOT USE BLEACH OR WHITENERS

THIS INCLUDES SOAKERS OR DOMESTIC DETERGENTS CONTAINING WHITENERS

#### LINE DRY IN SHADE

AVOIDING PROLONGED TIME IN SUNLIGHT REDUCES COLOUR FADING

**MAY BE TUMBLE DRIED ON WARM SETTING - FOLLOW GARMENTS CARE LABEL AND INSTRUCTIONS.**

#### HOT IRON ON REVERSED SIDE

DO NOT IRON TAPE IF APPLICABLE
